My Projects

SingleService + (Services x StyleQuantity) = EstSummary

EstSummary = EstTime, EstPrice, FRPercentage

Services = Time + ServicePrice

FRPercentage = NumberOfSelectedVariables

In order to determine what factory ready is, we would have to know the total of selected variables and divide it by the number of all of the available variables.

NumberOfAllVariables

LogoDesign + (ConceptDevelopment x StyleQuantity) = EstSummary

$(125 \times 8) + ((125 \times 8) \times 4) = \text{EstSummary}$

SingleServices + (Services x StyleQuantity) = EstSummary

EstSummary = EstTime, EstPrice, FRPercentage

EstTime = SelectedServices

Services = Time + ServicePrice

FRPercentage = NumberOfSelectedVariables

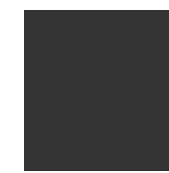

NumberOfAllVariables

In order to determine what factory ready is, we would have to know the total of selected variables and divide it by the number of all of the available variables.

SingleServices = SingleServicePrice x SingleServiceTime

Ex. LogoDesign = \$125 x 8hrs

LogoDesign + (ConceptDevelopment x StyleQuantity) = EstSummary
